

DIGITAL VACCINATION CARD

DISCOVERY HEALTH

2022

You can now access your digital vaccination card

A digital version of your vaccination card is now available on our [COVID-19 Vaccination Navigator](#). Your digital vaccination card enables convenient access to your vaccination details and also integrates your information about recent COVID-19 tests, for your records and safe keeping.

How the digital card works?

The card is populated with your vaccination claims information. If this information is incomplete or incorrect, you can upload a photo of your physical vaccination card on the [COVID-19 Vaccination Navigator](#). We will then capture and validate the correct details and update this on your profile within 24-48 hours. The digital vaccination card is stored on your profile so you can access your vaccination details easily on-the-go. Unfortunately, it is **not yet considered an appropriate travel document**.

Get access to your digital vaccination card in a few simple steps

Step 1

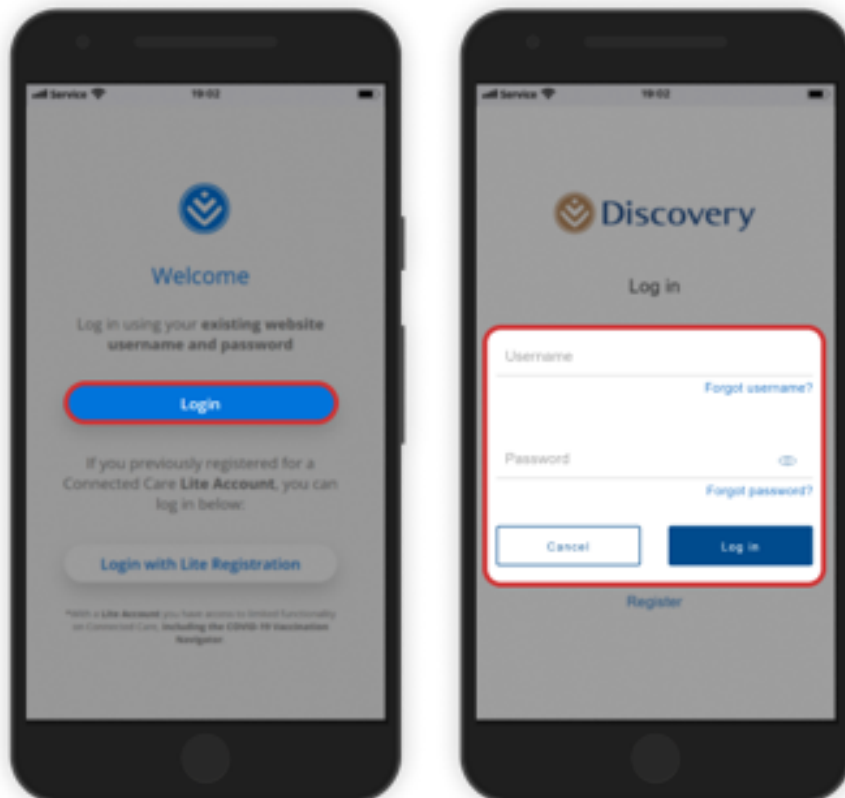

Click [this link](#) to access [Connected Care](#) or scan this QR code.

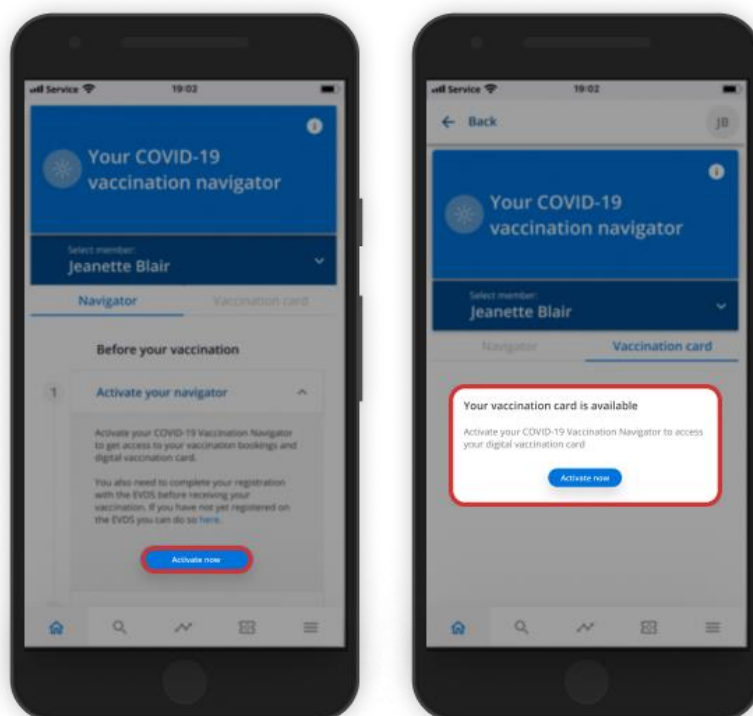

Step 2

Login with your existing Discovery username and password.

Step 3

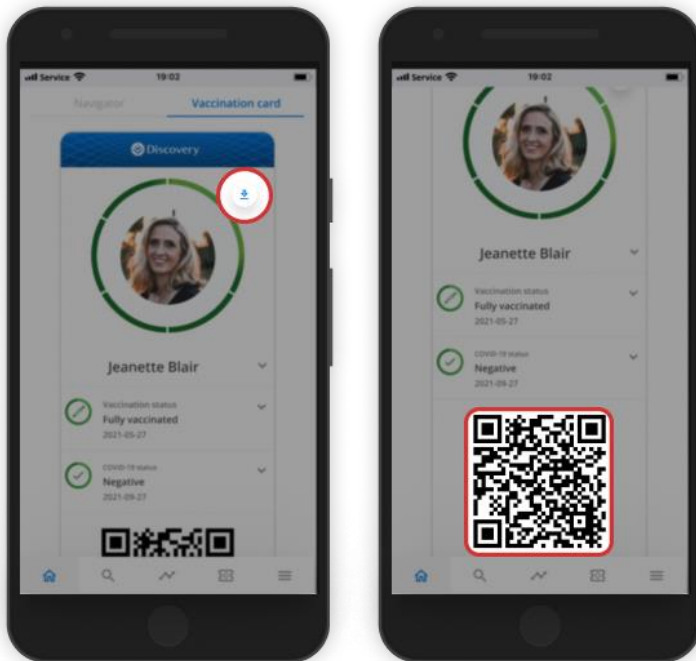

If you aren't yet registered on our [COVID-19 Vaccination Navigator](#), do so.

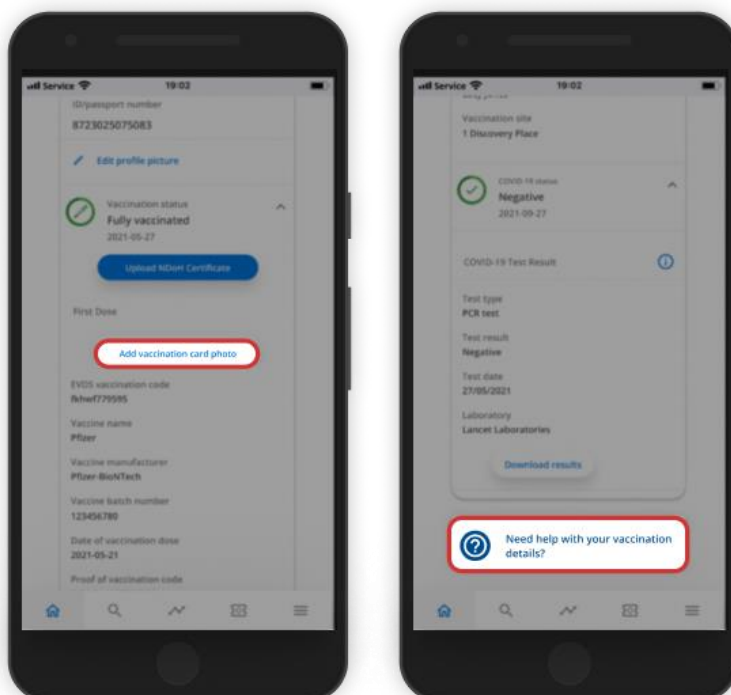

Step 4

Now you can access your digital Vaccination card and QR code.

Step 5

Need help with your data? Use the help wizard to take a photo of your physical card and the Discovery team will assist.

Step 6

Easily upload your NDoH vaccination certificate here for digital safe keeping.
